

Data Sheet | Model: **Armorgard**

FlexiKart FK4

-  A robust pallet skate which increases safety and reduces physical strain when manoeuvring loads manually.
-  Maximum working load capacity of 1200kg.
-  All 4 support arms can be raised individually as required, and when not in use they fold below the bed height.
-  Able to hold 1200x1000 pallets when all 4 support arms are locked upright.
-  With the support arms folded down, the FlexiKart can accommodate larger loads, or can be twinned with a second FlexiKart for long loads such as metal beams, wood, pipe, conduit and other materials.
-  Built in lashing points allow loads to be secured, which safely prevents them falling off when manoeuvring.
-  Four swivel castors (two are braked), allow the FlexiKart to be easily moved in any direction.
-  The FlexiKart is easily stackable when not in use, for maximum space efficiency.
