

Office Cabinet Range
– for protecting
essential documents
against fire and theft

Office

FIRE-RESISTANT DOCUMENT PROTECTION

Fire can strike anywhere and the consequences can be disastrous for any organisation. Information lost may never be replaced, possibly leading to closure from resulting legal action, lost cash flow or delay in insurance pay outs. Chubb safes' Office Cabinet range should be part of your organisation's disaster recovery plan so as to ensure survivability in the event of a major incident.

Key Features

- Certified by SP (NT 017) for 120 minutes of fire-resistance
- Cabinet walls comprise an inner and outer steel shelf containing a specially formulated fire-resistant solid barrier material
- Models are secured by a user-friendly programmable electronic lock
- The electronic lock can be programmed with two user codes which can easily be changed by the owner whenever the need arises. Should battery power be lost, batteries are housed externally in the lock keypad itself and can easily be changed
- Self-locking closure. Simply close the door and the cabinet locks itself!
- All models come with internal shelves which can be set at any position thanks to the internal "ladder racking" style mounting points

785	1695	1210	655	1535	1045	485	783	670	4

Dimensions exclude handle and hinge projections

Testing

The Office range is tested and certified in accordance with NT Fire 017 – 120 Paper, which means that your paper documents are protected against fire for two hours. Thanks to its insulated walls, the cabinet's internal temperature will not rise above 177°C.
