

Lapbank iPorta 16 Charge Connect

Portable Storage with Sync & Charge for 16 iPads

Sync. Charge. Store.

The iPorta ChargeConnect 16 provides convenience, portability and device management for up to 16 iPads and tablet PC's in an all-in-one durable solution.

Customizable high density foam for 10" or 7" devices with varying case thicknesses

Charge and connect with lid closed

Spare integral power sockets for peripherals

Option for integral powered access point

Option for twin padlocks to lid

The iPorta Charge Connect 16 is able to safely store, sync and charge a mix of up to 16 devices at once; iPads, iPad minis, iPhones, iTouch, and all tablet PC's which connect through USB, including Kindles.

This is achieved by using cutting edge technology to ensure that the device's charging profile is delivered to each individual device, ensuring optimum charging, no matter which device is used.

The highly mobile and very durable case is extremely simple to use, convenient to handle and the optional twin padlocks add an element of security to the solution.

Future Proof

The micro USB connection allows new charging profiles to be updated when the latest version of a tablet is released.

Flexible

Mix and match devices to be charged and synchronised or backed up. Range of standard cushioned high density foam sizes covers all cases up to 26mm thick. Custom sizes available.

Connected

External power connection coupled with ventilation allow the user to close the lid when devices are charging. This allows the case to be easily stored when charging.

External ethernet connection allows a wireless access point to be integrated and stored within the spare compartment, expanding your wireless network. (Wireless access point sold separately).

Power Up

The integrated 4 way power strip allows users to power the wireless access point, laptop and other peripherals from within the iPorta for maximum convenience.

Total Solution

The durable polypropylene case has compartments for the stowage of a laptop and adapter, wireless access point and power cable, completing the self-contained management solution.

Note: When syncing multiple Apple devices using iTunes:

Mac computers can sync up to 30 iPads or Apple products simultaneously.

For PC's operating Windows software, iTunes will sync up to 7 iPads or Apple products simultaneously.

For 10" iPads and Tablets
