

# Lap-Porta

## Ruggedized Laptop Transporter

**Ruggedized Lap-Porta 10  
Laptop Transporter**

**High Density Foam Inserts  
Stores Laptop and Chargers**

**The Lap-Porta Laptop Transporter provides the perfect vehicle for transporting multiple laptops along with their chargers in outdoor conditions.**

The Lap-Porta Range is not only ruggedized, being dust proof, waterproof and crushproof but features extra durable, smooth wheels and a strong handle to enable single handed use.

Constructed from lightweight, yet extremely durable, non-conductive material, the Lap-Porta is coupled with custom designed high density foam inserts to suit your laptop's dimensions, promoting excellent shock resistant qualities during transportation.

### Application:

**The Lap-Porta Transporter is perfect for the movement of multiple laptops in outdoor or extreme conditions.**

### Key Features:

**Highly Engineered** - constructed from high performance resins allowing lighter weight construction with greater robustness.

**Excellent Shock Resistance** - the hi-tech resins used have slightly elastic properties, which when coupled with the custom designed high density foam, provides excellent shock resistance.

**Stable Environment within the Case** - the Lap-Porta is a waterproof case, which along with the pressure relief valve, enables the case to retain a stable internal environment.

**Maneuverable** - the strong handle provides a firm grip, along with smooth, robust wheels allowing the Lap-Porta to be easily maneuvered.

**Security Compatible** - padlock option available.
