

1 Hour Lateral Fireproof Filing Cabinets

- 60 minutes fire resistance for documents
- UL Tested and Certified
- Fire, impact and explosion resistant
- Large filing capacity
- Gypsum insulation
- Steel mesh reinforcement
- Drawer lock and 2 position catch
- Suitable for A4 or legal documents

Robur Lateral Fireproof Filing Cabinets are built to last. They feature a gypsum barrier material that provides up to 1 hour of fire resistance. Each drawer is insulated separately, so once a drawer is closed, it provides a full level of protection even if other drawers are accidentally left open. An internal latticework reinforcement provides excellent strength and robustness.

Stringently tested to the UL 72 Class 350 standard, these fireproof filing cabinets will protect documents even in temperatures exceeding 1000° Celsius. They are also designed to withstand a drop/impact from approximately 9.1 metres onto rubble, similar to what might occur should a floor or building collapse during a fire. Lastly, they are also tested for their ability to withstand rapid heating without rupturing or exploding.

Lateral Filing Cabinets are wider than standard models, offering an increased amount of storage space. The wide drawers make it easy to quickly search through files, which can be arranged front to back or side to side.

A single key lock is fitted as standard to each cabinet. This can be used to open or lock any combination of drawers at once. Each drawer can store either A4 or legal documents. An A4 frame is included as standard. All cabinets are finished in a scratch resistant light-grey powder coat which blends easily into any office environment.

Specifications

MODEL	EXTERNAL DIMENSIONS	DRAWER DIMENSIONS	DRAWERS	WEIGHT
3-3822C	1030 x 950 x 565mm (HxWxD)	275 x 810 x 385mm (HxWxD)	3	343kg
4-3822C	1340 x 950 x 565mm (HxWxD)	275 x 810 x 385mm (HxWxD)	4	411kg
