

DBM Deposit Safe Box

- Ideal for retail environments
- Can be used as an under-counter safe
- Drawer deposit with anti-fishing mechanism
- Easy to use
- Robust steel body and reinforced chute
- Suitable for anchoring

A deposit safe makes an ideal addition to any retail premises, allowing staff to quickly secure takings. The Robur DBM Deposit Box is compact enough to fit under most shop counters. Its trap deposit mechanism is easy to operate, meaning cash and cheques can be easily stowed.

Separate keys are used to open the trap and the main door of the safe, so only authorized personnel will be able to access deposits once the hatch is closed. This helps reduce in-house thefts and also means staff cannot be forced to open the safe under duress. Special plates on the chute prevent items from being “fished” through the deposit opening.

Robustly constructed from 3mm cold rolled steel, the Robur DBM provides light to medium level security. The safe's main door is fitted with a secure, changeable key lock rated to Class C under the EN1300 standard. The upper hatch is fitted with an ASSA twin lock cylinder for easy opening.

Small and secure, the Robur DBM Deposit Box is designed to be anchored for maximum security.

External Dimensions: 380 x 250 x 350mm (HxWxD). **Internal Dimensions:** 209 x 246 x 304mm (HxWxD)
Deposit Trap: 25 x 150 x 50mm (HxWxD). **Weight:** 22kg
