- Valuables Insurance Rating: €2,200,000
- Fire Rating for Paper: 60 mins*
- Fire Test: NT FIRE 017*

* Excludes 1800 models.

Incredibly strong and incredibly secure, Robur Grade VI Safes are designed in Sweden and have been tested to stringent European burglar resistance standards by the renowned SBSC testing lab. Rated Grade VI under the EN 1143-1 test, these safes provide protection for up to €220,000 in cash and up to €2.2 million in valuables. Large locking bolts secure the door once locked.

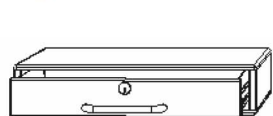

In addition to typical burglar resistance test which use tools such as hammers and blowtorches, these safes have also been tested for their ability to resist attacks using explosives. They are fully certified to the EX requirement under the EN 1143-1 standard. Models 900 to 1500 provide an impressive 60 minutes of protection for papers and documents and have been subjected to the NT FIRE 017 fire resistance test. Strong barrier materials in the door and walls of the safe help fend off both burglars and heat.

The door lock system features a uniquely designed turn wheel modelled on the Robur logo. Dual changeable key locks are fitted as standard to all models. An easy grip handle removes the strain of opening the door. A Class C digital lock upgrade is available by special request.

Safe breakers will often use special drills in an attempt to breach a safe. Robur Safes with a CD designation provide special protection against such attack. It is highly unlikely a potential thief could drill his way through such a safe before being discovered. CD models are certified by the ECB-S.

Ideal for commercial use, Robur Grade VI security safes are finished in an off white powder coat paint which will suit any office environment.

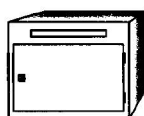

Optional Extras

Lockable Drawer

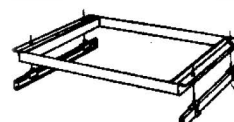

Lockable Cupboard

Security Cupboard

Extra Shelf

Sliding Frame

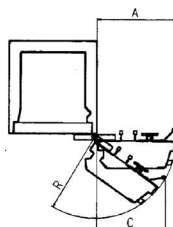

Digital Lock
