

I-340 Eurograde Safe

- ECB-S Approved
- Fire and security protection
- Compact design
- Ideal for the home or office
- Fire Test: EN 15659 LFS 30P
- Burglary Test: EN1143-1 Eurograde I

The Robur I-340 is an ideal safe for the home or office. Compact in size, it combines burglar and fire resistance, offering you the best of both worlds when it comes to protecting your valuables.

Certified by the ECB-S, the I-340 meets the EN 1143-1 Eurograde I security standard. To achieve this, the safe must be capable of withstanding various attempts at penetrating its walls and door using tools such as hammers, cutting torches and drills. Meanwhile, the lock is tested to the EN 1300 standard and is also subjected to expert testing and attempts to bypass it.

Ideal for storing small, valuable items, cash, important documents and more, the Robur I-340 provides up to 30 minutes of fire resistance. The unique turn handle design makes it both eye-catching and easy to operate. The safe's RAL 9010 off-white powder coat paint finish will suit any environment perfectly, whether at home or in the office. Its relatively small size makes the safe unobtrusive and easy to conceal.

A high security key lock is fitted as standard. This can be upgraded to a Kaba electronic lock which features 2 user codes and an optional time delay feature.

External Dimensions: 340 x 500 x 345mm (HxWxD)

Internal Dimensions: 262 x 424 x 216mm (HxWxD)

Weight: 93kg
