## A Little More Detail:

## Improved Livery:

In response to client feedback the product is easily identifiable.

## Chrome bolt cups, felt lined interior and jewellery shelf:

Chrome bolt cups give the safes an improved aesthetic appearance.

Felt lining to the sides and rear of the safe, combined with a soft foam pad in the base, provide improved protection to valuables from damage.

The adjustable shelf (where applicable) has a tough paint finish to one side and is felt lined on the other. The lined side is ideal for preventing damage to delicate or valuable possessions such as rings, watches, iPad, cameras, mobile phones etc...

## Motion Sensitive Light:

3 bright LED's improve visibility inside the safe, particularly when fitted in a cupboard or wardrobe.

Switches off automatically (30 seconds approx)

Magnetic fixing – no tools required

Battery operated – batteries included
